

RADIANT PANEL SYSTEM

Roth's versatile, lightweight panel system has the insulation on the bottom and the aluminum heat transfer sheet on the top - The way it should be!

- Can be installed over any new or existing subfloor
- Used with a variety of floor coverings
- Ideal for wall and ceiling radiant installations
- Easily installed over an existing concrete floor
- Lightweight - Easy to transport and install
- Two pipe sizes: 3/8" & 1/2"
- Quick recovery time allows for night time setback
- Panel height: 3/8" - .75" (19 mm) 1/2" - 1" (25 mm)
- Insulation R-values: 3/8" - R-3.7 1/2" - R-4.5
- Tubing centers: 6" (15.24 cm) (Can use 12" center if desired)
- Aluminum Sheet: 24 ga
- Insulation: High density EPS (Expanded Polystyrene) 90 psi (6.3 kg/cm²)
- Normal Operating Temperatures: 60° F - 140° F (15° C - 60° C)
